Natural or Blended Latex?

Choose from 100% Natural Latex or Blended Latex (30% Natural Latex + 70% Synthetic Latex), both processed using the Talalay method.

Which is right for you?

The appearance, touch, feel and performance are virtually the same, which is why FloBeds offers a 20 Year Warranty for BOTH our Blended and Natural Latex mattresses.

The most recent Latex International testing demonstrates a 2.6% increase in natural latex softening, and a .9% increase in height loss of natural latex versus the blended over ten years.

100% Natural Latex is the best choice for those looking for a **chemical-free bed**, although we have found that offgassing is NOT an issue with Blended Latex.
