

Euro Slat Foundation

Contouring Bent Beech Slats

- Provide both give and rotation
- Constantly respond to the shifting planes of your body.
- Keeps your spine straight and give just the right amount of support.
- Bent-Beech Slats are incredibly durable.
- They won't break, crack or bend out of shape.

Adjustable firmness

Slats in your FloBeds Euro Foundation can be individually adjusted. Your Euro Slats have been shipped for extra lumbar support (firmer under the small of your back) and shoulder relief.

Anywhere you have three slats with a camber, your bed will be firmer. Two cambers are firmer than one.

You can remove the cambers to provide less resistance according to your comfort needs. You may also change the area that has the adjustable firmness by moving the third slat to another slat holder.

Adjust to provide the comfort and support your body deserves...now and years from now after bodies change over time due to weight gain or loss, back or muscle
