Instructions for Shrinking Latex Cores

1) Fold core in thirds and place in larger plastic bag.
2) Use vacuum to shrink down to small bag size.
3) Slide into smaller bag.
4) Place in box with copy of order, seal and affix Return Label.

How to Shrink Latex Cores for Shipping

Tools Needed:
• Original Plastic Bags
• Vacuum with Hose
• 2" Packing Tape

1. Fold core into thirds.

2. Place folded core into larger plastic bag.

3. Place end of vacuum hose into bag, slightly between latex folds. Loosely twist bag around hose and squeeze tight. Turn on vacuum. If vacuum slows, pull back hose ½" or so.

4. When the core has shrunk to ⅓ it's size, pull hose out, and twist bag tightly.

5. Immediately place it into the smaller plastic bag twisted end out, then roll the end of the smaller bag and tape closed.

6. Place it into the box. Seal with 2" packing tape.
